### The Museum Of Everything

For those of you who missed out on [The Museum of Everything](#) last time, I'd totally understand if you might need a moment to stop reading and slap yourself in the face. I'd do the same if the memory of missing the best exhibition of the year came back to haunt me, Sixth Sense Style. But before you go and self harm, you can repent such sins because The Museum of Everything is back, with Exhibition #3. This time, Sir Peter Blake is one of the collaborators, showcasing some never-been-seen hoards from his studio. But it's not just about the big names. The Museum of Everything is a collection of art at its best, showcasing genuinely unexpected, fu\*cking, beautiful pieces. GO, you've got until the end of December, and if you don't, Bruce will come get you. / [Vanessa Morrish](#)
